

Student Name: _____

Class Name: **College Algebra FA26 - 014 MW 2:30**Number of Questions: **10**Instructor Name: **Mamani Velasco, Ruben****Question 1 of 10**

Write the following as a radical expression.

$$15^{\frac{5}{8}}$$

Question 2 of 10Solve for w .

$$|2w + 6| - 24 = -8$$

Question 3 of 10Solve for v .

$$1 = v - \frac{12}{v}$$

Question 4 of 10

Solve for w , where w is a real number.

$$\sqrt{w + 4} = 7$$

If there is more than one solution, separate them with commas.
If there is no solution, click on "No solution".

$w =$

Question 5 of 10

Find all real number solutions.

$$x - 5x^{\frac{1}{2}} + 4 = 0$$

Question 6 of 10

Write inequalities to represent the situations below.

- (a) The cargo of the truck weighs no more than 2,300 pounds.

Write an inequality using w to represent the weight (in pounds) of the cargo.

- (b) Amanda exercises more than 30 minutes per day.

Write an inequality using t to represent Amanda's amount of exercise (in minutes per day).

Question 7 of 10

Solve the inequality for y .

$$-8y < \frac{12}{11}$$

Simplify your answer as much as possible.

Question 8 of 10

Solve the compound inequality.

$$3x - 5 \leq 4 \text{ and } 3x - 1 > -13$$

Graph the solution on the number line.

Question 9 of 10

Solve the compound inequality.

$$2w + 5 > 7 \quad \text{or} \quad -4w < -20$$

Write the solution in interval notation.

If there is no solution, enter $\emptyset$.

Question 10 of 10

Solve.

$$3|w - 1| - 6 > 3$$

Class Name: **College Algebra FA26 - 014 MW**
2:30

Number of Questions: **10**

Question 1 of 10

$$\sqrt[8]{15^5}$$

Question 2 of 10

$$w = 5, -11$$

Question 3 of 10

$$v = 4, -3$$

Question 4 of 10

$$w = 45$$

Question 5 of 10

$$x = 16, 1$$

Question 6 of 10

(a) The cargo of the truck weighs no more than 2,300 pounds.

Write an inequality using w to represent the weight (in pounds) of the cargo.

$$w \leq 2,300$$

(b) Amanda exercises more than 30 minutes per day.

Write an inequality using t to represent Amanda's amount of exercise (in minutes per day).

$$t > 30$$

Question 7 of 10

$$y > -\frac{3}{22}$$

Question 8 of 10

Question 9 of 10

$(1, \infty)$

Question 10 of 10

$w < -2$ or $w > 4$
